Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 5, 6 and 7, drawn to a monofilament and, classified in class 428, subclass 364.
- II. Claims 3 and 4, drawn to a sheath-core fiber and side-by-side fiber, classified in class 428, subclass 373.
- III. Claims 8-11, drawn to a method of making a monofilament, classified in class 264, subclass 172.14+.

If group I is elected, applicant is required to elect a single disclosed species for claims 5, 6 and 7.

The inventions are distinct, each from the other because:

Inventions group I and group III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as spinning, co-extruding, layering, cooling, drawing and winding.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1774

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Herbert Dubno on August 21, 2004, however Ms. Bernstein said the firm only takes written restriction.

Any inquiry concerning this communication should be directed to Primary Examiner Edwards at telephone number (571) 272-1521.
